Overview Shanghai Medical College

Shanghai Medical College of Fudan University, formerly Shanghai Medical University, was founded in 1927 and is well known both domestic and abroad for her long history and academic achievement. She has 27 departments of basic medical science and clinical medicine. The school is equipped with good teaching facilities and school running condition. There are 10 affiliated hospitals with advanced medical apparatus, serving as the school's teaching and internship base. Making full use of Fudan's comprehensive scope of subject, the school offers interdisciplinary programs while featuring its prominence in medicine and clinical study.

The School proudly presents not only a number of well-known experts and professors who are highly revered for their academic achievements and superb medical skills, but also a group of middle-aged and young academic backbones and leaders. The School has established sound exchange relationship with many prominent medical schools throughout the world. Project cooperation's and exchange activities are also on the increase. Quite a number of teachers have had the experience of studying abroad, which greatly strengthened their capacity to teach in English.

Students

Now, Fudan University has nearly 44,300 students, including full-time students, students in Continuing Education or Network Education, as well as overseas students.

MBBS - An English-Taught Medical Undergraduate Program of Shanghai Medical College of Fudan University in 2008

Program Overview

According to "Provisional Regulations on Quality Control Standards of English-Taught Medical Undergraduate Education for International Students in China" The Ministry of Education of China has approved Fudan University as one of the thirty qualified universities in China to enroll international students in the English-taught undergraduate program of medicine.

To promote its international education, Fudan University will start to enroll international students in the English-taught undergraduate program of medicine in the fall-term of 2008. The program aims to educate international medical talents with solid medical knowledge, standard clinical skills and good professionalism while giving due consideration to the possible needs for them to serve in their motherland or other countries.

The students will acquire the capacity to work in medical and health departments, making contributions to the areas of patient care, education and research.

The program is completely taught in English and follows the principle of consolidating academic basis, stressing technical skills, enhancing interdisciplinary and conducting clinical practices.

Offered by Shanghai Medical College of Fudan University, this program is open to international students in pursuit of the science and practice of medicine. Those with exceptional performance will have oversea clinical internship opportunities. After completing the total required credits, students will be conferred diploma by Fudan University and qualified students will receive the Bachelor Degree of Medicine Science (M.B.B.S.). Graduates will have the opportunity to enroll for Physician Qualification Exam according to the relative regulations of the concerned country.

Shanghai City

Shanghai is the largest commercial and financial center in China and is considered by many to be the gateway to China. Praised as the 'Paris of the Oriental', the metropolis displays a beautiful synthesis of both modern and traditional Chinese features. Nowadays Shanghai attracts millions of visitors both from within China and abroad with its historical relics as well as its wide range of modern entertainment.

Economy

Shanghai is an important economic, financial, trade and shipping center in China. It contributes greatly to the whole nation's economic structure and the development of society.

Due to its excellent port, Shanghai has been a leading power of China's economic and trade development since ancient times. Since China's reform in 1978, Shanghai has had a more open environment and enjoys faster development especially since 2000. Shanghai's economy has increased by over 10% for 15 consecutive years.

Taking up only 0.06% of the country's land area, Shanghai now generates about 8.3% of China's gross industrial output value, 10% of its ports' cargo-throughput, 25% of the total value of the country's imports and exports and 12.5% of the total revenue of China.

Population 20 million
